

Automate Tasks, Increase Productivity

Job File Scheduler™ is a fully-functional automation program that minimizes redundant daily tasks and frees the IT department to work on more pressing issues. This integrated management tool enables the scheduling, tracking and reporting of automated tasks such as backup, processing and maintenance.

Job File Scheduler™ handles Symitar system tasks including:

- Scheduling of batch jobs
- Running of batch jobs
- FTP files/reports to and from Symitar
- Email notification of job completions or errors
- Dynamic answers to batch prompts allowed
 - > Answer this prompt with the next business date

Job File Scheduler™ benefits include:

- Full Symitar Integration
- Reliability and speed so you save time
- Flexibility so you can schedule what you want, when you want it
- Automation allows you to set it and forget it
